LASER HAIR REMOVAL

With the 4-wavelength diode laser, it is possible to effectively and permanently remove even light, red, or finer hair in an average of 4 to 7 sessions.

Did you know that even white hairs can still contain pigment at the root and can therefore be successfully treated?

This laser delivers far more effective results than other devices and features AI technology for automatic detection and optimal adjustment of the parameters according to your hair type.

We guarantee your hair-free results – except in cases of hormonal conditions.

If your hair proves particularly stubborn, from the ninth session onwards, we will treat you for free!

LIPOLYSIS INJECTIONS

The fat-dissolving injection can be used to treat local fat deposits all over the body.

Areas of application include:

Double chin, sagging cheeks, upper arms, armpits, abdomen, hips, saddlebags, knees, ankles, fat accumulation on the buttocks, chest, and inner thighs.

Edema can also be reduced with this method, but we can only confirm success after initial test treatments

- Fat-dissolving injection double chin € 160
- Fat-dissolving injection double chin + jawline € 250

All areas beyond these zones will use the maximum permitted dose per treatment

Choose between the **innovative Lemon Bottle** (effect in approx. 7 days) or a classic soy-based preparation (effect in approx. 2 weeks) – you decide!

Free initial consultation included!

Prices per session. Usually 2-6 treatments are required to achieve the desired result.
